

MHYNE JHESTINE MAGNO

Full-Stack Software Engineer | Next.js, TypeScript, AWS Serverless 2 Years Software Development Experience

Naif, Dubai, United Arab Emirates | jhestineitsolution@gmail.com | linkedin.com/in/mhyne-jhestine-magno-319551308

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2 years of software development experience across full-time employment, freelance projects, and internship work. Experienced in building cloud-based business web applications using Next.js, React, TypeScript, AWS, PostgreSQL, and Prisma. Skilled in role-based dashboards, GraphQL APIs, AWS Lambda functions, authentication flows, file upload workflows, inventory systems, internal operations platforms, and AI-assisted development workflows.

CORE TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Chakra UI, TanStack Query

Backend/API: Node.js, Python, FastAPI, REST APIs, GraphQL, AWS Lambda

AWS/Cloud: AWS Amplify Gen 2, AppSync, Cognito, RDS, S3, CDK, AWS Console, Vercel, Render

Databases: PostgreSQL, Prisma ORM, MongoDB, DynamoDB, Firebase, Supabase

Testing/Validation: Vitest, Zod, automated unit testing, type-safe validation

AI Development Workflow: Claude Code, Codex, AI coding environment setup, project instructions, debugging, refactoring

Other: Git, GitHub, API integration, role-based access control, debugging, Agile collaboration

PROFESSIONAL EXPERIENCE

O-KUN Frontier Innovations Inc. | Full-time | April 2025 - Present

Lead Software Engineer | April 2026 - Present

- Led development flow for a cloud-based internal operations platform, including task breakdown, implementation direction, and delivery coordination.
- Reviewed other developers' work, provided technical feedback, and mentored a junior developer on frontend and project implementation.
- Handled client-facing responsibilities including requirements clarification, progress updates, feedback discussions, and project coordination.
- Built role-based dashboards and workflows for administrators, store users, technicians, and head-office managers.

Software Engineer | April 2025 - March 2026

- Developed and maintained business web applications using Next.js, React, TypeScript, and AWS.
- Implemented GraphQL APIs and AWS Lambda functions for ticketing, scheduling, maintenance, and user workflows.
- Integrated Cognito authentication, PostgreSQL data models, Prisma ORM, S3 file handling, and AWS serverless infrastructure.

Zhiyuan Enterprise Group Inc. - Web Development Intern | Internship | January 2025 - March 2025

- Developed an inventory management system tailored to company operational needs.
- Implemented database structures for product tracking and inventory records; supported users during adoption.

Technology Stack: Full-Stack Development, MERN Stack

Freelance Web Developer | Freelance | 2023 - January 2025

- Designed and developed web-based projects for clients using full-stack web technologies.
- Built client-facing pages, database-backed features, and custom web application workflows.
- Handled requirement clarification, implementation, troubleshooting, and delivery support.

Technology Stack: Full-Stack Development, MERN Stack

SELECTED PROJECT EXPERIENCE

Repair and Maintenance Management System | Full-Stack Developer / Project Lead | March 2026 - Present

- Cloud-based internal operations platform for repair tickets, preventive maintenance, technician visits, service reports, equipment, stores, and users.
- Implemented ticketing, scheduling, preventive maintenance tracking, service reporting, store management, machine tracking, and file upload workflows.
- Developed GraphQL APIs and AWS Lambda functions with Cognito-based authentication and authorization.
- Integrated PostgreSQL, Prisma ORM, Amazon S3, AppSync, and AWS Amplify Gen 2 infrastructure.

Technology Stack: Next.js 16, React 19, TypeScript, shadcn/ui, Tailwind CSS, TanStack Query, AWS Amplify Gen 2, AppSync, Lambda, Cognito, RDS PostgreSQL, Prisma ORM, S3, CDK

Fully Serverless Sales Management System | Frontend Developer | August 2025 - March 2026

- Developed frontend modules for internal sales and operational workflows; integrated API endpoints with forms, tables, loading states, validation, and error handling.

Technology Stack: Next.js, TypeScript, Chakra UI, AWS

University Management System | Frontend and Backend Developer | May 2025 - August 2025

- Built responsive pages and reusable UI components for directory, blog, calendar, and role-based navigation features; integrated frontend pages with backend APIs.

Technology Stack: Next.js, TypeScript, Chakra UI, FastAPI, AWS

EDUCATION

STI Global City | Bachelor of Science in Information Technology
